RE: Garrison Boulevard Corridor Study: Existing Traffic Conditions and Volume Growth Memo

This memorandum describes the existing traffic conditions and recommended volume growth rates as part of the Garrison Boulevard Corridor Study, which has limits from the Avon/Catawba Creeks Greenway at Lineberger Park (approximately at Fern Forest Dr) in the west to New Hope Road in the east. The intersections along the study corridor that are included in the traffic analysis are as follows and shown in **Figure 1**.

1. Garrison Boulevard at Chestnut Street,
2. Garrison Boulevard at Churchill Drive,
3. Garrison Boulevard at Burtonwood Drive, and
4. Garrison Boulevard/Armstrong Park Drive at New Hope Road.

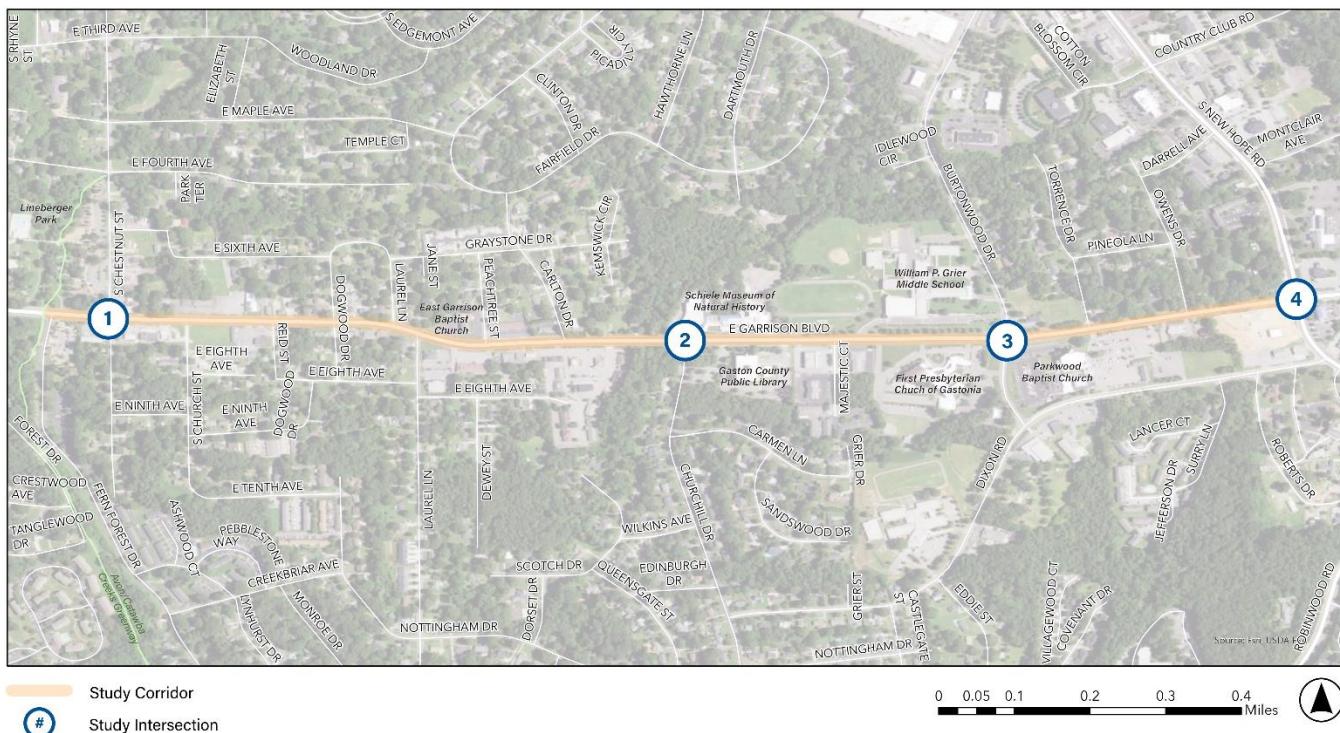

Figure 1. Garrison Boulevard study corridor and study intersections.

EXISTING TRAFFIC VOLUMES AND SPEEDS

Forty-eight hour vehicular speed, volume, and classification tube counts were collected on Wednesday, May 3 and Thursday, May 4, 2023 at two locations along the corridor (east of Chestnut Street and east of Burtonwood Drive). The daily volumes at these count locations are shown in **Figure 2** and **Figure 3**.

Figure 3. Existing volumes on Garrison Boulevard east of Burtonwood Drive (Quality Counts, 2023).

The tube counts indicate that the true hourly peak occurs during mid-afternoon, around 3 pm, coinciding with school operations. However, the difference between the hourly volume at 3 pm is less than 100 vehicles more than the hourly volume at 5 pm, showing that PM peak traffic volumes are generally sustained at a consistent level over approximately a 4-hour peak period from school dismissal through the typical commute hours.

The existing speed limit on the study corridor is 45 miles per hour. Speed distributions collected from two count locations on May 3 and May 4, 2023 are shown in **Figure 4** and **Figure 5**. Vehicles were generally traveling near or slightly above the speed limit, with 85th percentile speeds of 46 miles per hour on Garrison Boulevard east of Chestnut Street and 48 miles per hour on Garrison Boulevard east of Burtonwood Drive. The percentage of vehicles observed to be traveling over the speed limit on the corridor was 19.4% east of Chestnut Street and 29.3% east of Burtonwood Drive.

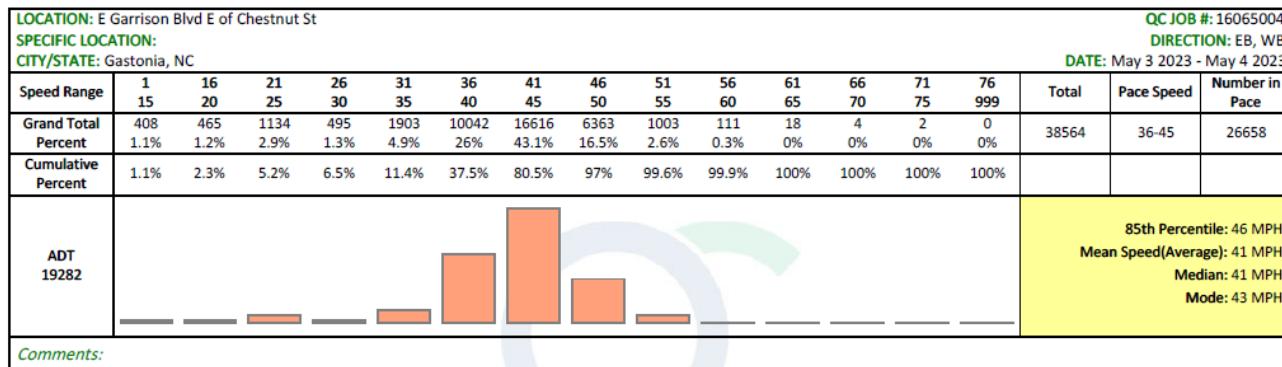

Figure 4. Existing speeds on Garrison Boulevard east of Chestnut Street (Quality Counts, 2023).

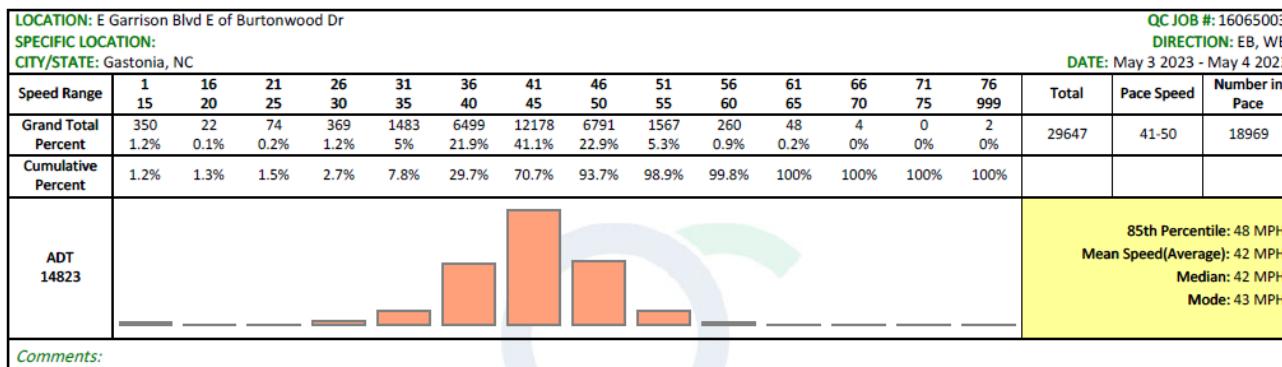

Figure 5. Existing speeds on Garrison Boulevard east of Burtonwood Drive (Quality Counts, 2023).

EXISTING INTERSECTION OPERATIONS

All four study intersections are currently signalized. The existing weekday AM, afternoon, and PM peak hour volumes at each intersection were analyzed in Synchro 11 using Highway Capacity Manual (HCM) 6th Edition methodologies. Weekday AM and afternoon counts for all study intersections except for Garrison Boulevard at Chestnut Street were collected on Thursday, May 12, 2022 as part of the Grier Middle School Expansion TIA (dated January 13, 2023), which analyzed the weekday AM and afternoon peak hour volumes. Weekday AM, afternoon, and PM vehicular turning movement counts (TMCs) for Garrison Boulevard at Chestnut Street were collected on Wednesday, May 3, 2023, and Weekday PM counts for the three eastern study intersections were collected on Thursday, May 11, 2023 (provided in **Appendix A**). Signal timings for the three eastern intersections were consistent with those from the timing plans provided in the Middle School TIA, and timings for Garrison Boulevard at Chestnut Street were obtained from North Carolina Department of Transportation (NCDOT) signal plan data (provided in **Appendix B**).

A peak hour factor (PHF) of 0.9 was used for the PM peak hour analyses to be consistent with NCDOT Capacity Analysis Guidelines. This value was, overall, more conservative than the intersection PHFs from the traffic counts, which ranged from 0.89 to 0.97.

Note that the weekday AM and afternoon Synchro parameters used for the analysis were consistent with those from the Middle School TIA except for the following changes that are also reflected in the weekday PM analysis:

- Updates to the heavy vehicle percentages on all approaches to reflect the collected counts, with a minimum of 2% heavy vehicles (the TIA previously used a 2% heavy vehicle percentage across all approaches),
- Updates to the eastbound and westbound through movement signal timings (phases 2 and 6) at all intersections to have minimum, rather than maximum, recalls, based on the latest NCDOT signal timing plan data (see **Appendix B**), and
- Coding all movements with less than 4 vehicles per hour as 4 vehicles per hour based on NCDOT Capacity Analysis Guidelines.

Figure 6 shows the TMCs used for the existing weekday AM, afternoon, and PM peak hour analyses.

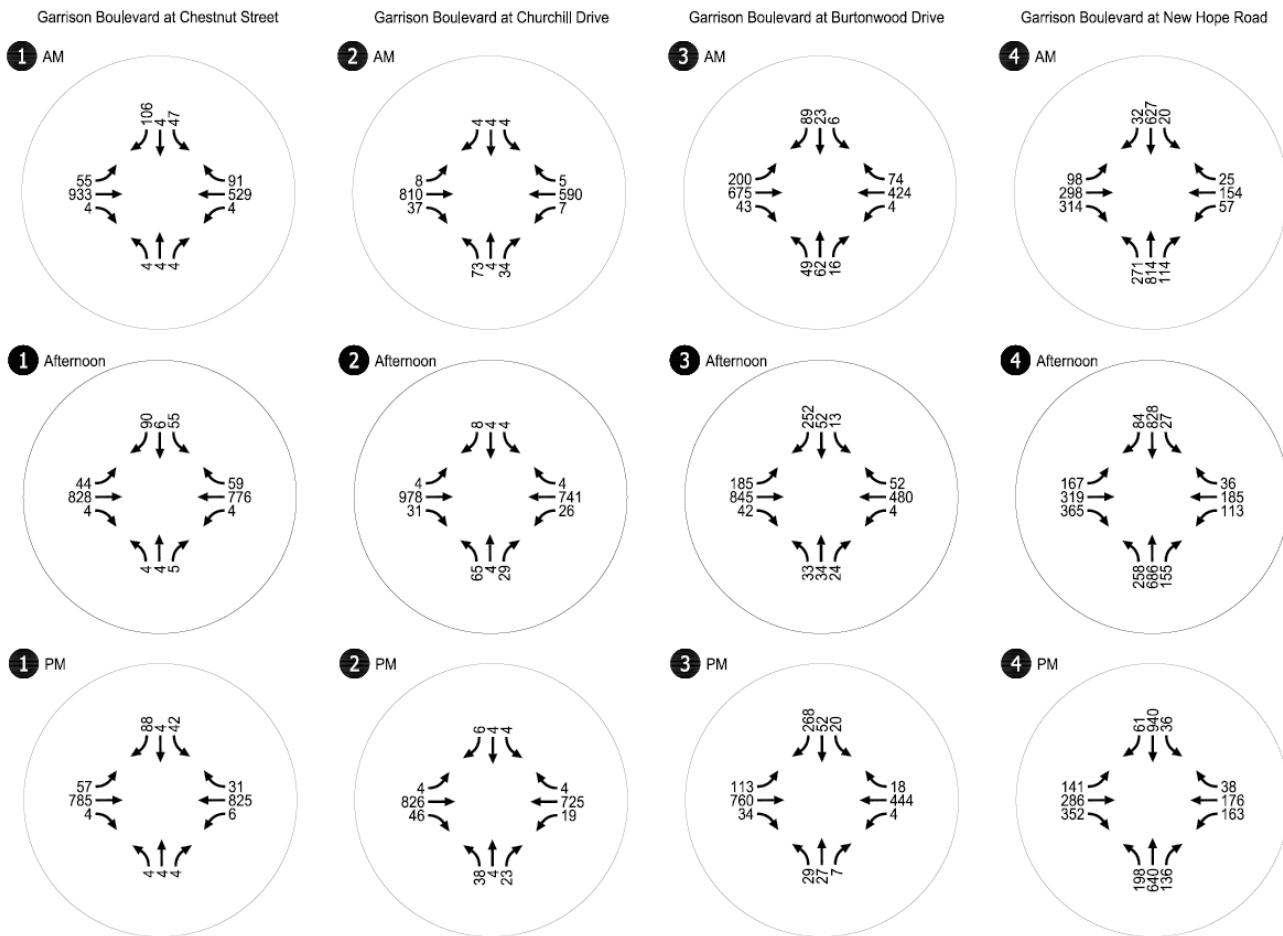

Figure 6. Existing weekday AM, afternoon, and PM peak hour TMCs.

Table 1 through **Table 4** summarize the existing approach-level intersection operations for the weekday AM, afternoon, and PM peak hours. All intersections currently operate at a LOS D or better during each peak hour analyzed. Full operational analysis results are provided in **Appendix C**.

CRASH HISTORY

In the five-year timeframe from May 1, 2018 to April 30, 2023, there were 189 crashes that took place along the study corridor. **Table 5** provides a high-level crash summary for the corridor. **Table 6** and **Table 7** show the overall five-year corridor crash trends by severity and type. **Table 8** and **Figure 7** show the crashes by time of day, and **Table 9** shows the crashes by year and severity. The complete crash analysis summary, generated using the NCDOT Traffic Engineering Accident Analysis System (TEAAS), is provided in **Appendix D**.

Table 5. Five-Year High-Level Crash Summary

Crash Type	Number of Crashes	Percent of Total
Total Crashes	189	100.00%
Fatal Crashes	0	0.00%
Total Injury Crashes	54	28.57%
Property Damage Only Crashes	135	71.43%
Night Crashes	31	16.40%
Wet Roadway Crashes	33	17.46%
Alcohol/Drug-Related Crashes	7	3.70%

Table 6. Five-Year Crash Severity Summary

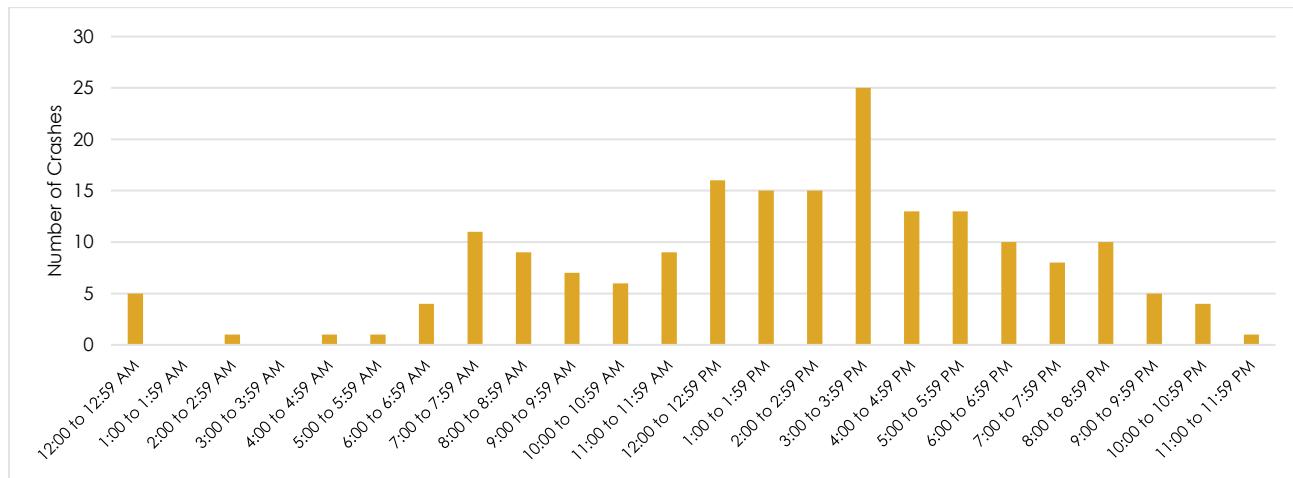

Crash Type	Number of Crashes	Percent of Total
Fatal Crashes	0	0.00%
Class A (Disabling Injury) Crashes	0	0.00%
Class B (Evident Injury) Crashes	8	4.23%
Class C (Possible Injury) Crashes	46	24.34%
Property Damage Only Crashes	135	71.43%

Table 7. Five-Year Crash Type Summary

Crash Type	Number of Crashes	Percent of Total
Angle	35	18.52%
Animal	2	1.06%
Backing Up	2	1.06%
Fixed Object	2	1.06%
Left Turn, Different Roadways	15	7.94%
Left Turn, Same Roadway	10	5.29%

8:00 to 8:59 PM	10	5.29%
9:00 to 9:59 PM	5	2.65%
10:00 to 10:59 PM	4	2.12%
11:00 to 11:59 PM	1	0.53%

**Figure 7.** Graph of five-year total crashes by time of day.**Table 9.** Crash Totals by Year and Severity

Year	Number of Months	Total Crashes	Fatal Crashes	Injury Crashes	PDO Crashes
2018	8	26	0	9	17
2019	12	49	0	20	29
2020	12	28	0	8	20
2021	12	34	0	8	26
2022	12	43	0	8	35
2023	4	9	0	1	8
Total		189	0	54	135

Over 70 percent of crashes were property damage only (PDO) and the predominant crash types were rear end crashes, frontal crashes (angle, left turn, or right turn), and sideswipe crashes. One crash involved a pedestrian, where the pedestrian ran north across Garrison Boulevard at Church Street and was struck by an eastbound vehicle. The severity index (SI) for the corridor is 3.11, indicating that crashes have generally been less severe. (An SI of 8.4 is the threshold for locations that have more serious crashes.)

A higher number of crashes took place during the afternoon and evening hours between 12 PM and 6 PM compared to other times of day, with a peak in crash frequency between 3:00 and 3:59 PM. This hour corresponds to when school dismissal generally occurs (Grier Middle School on Garrison Boulevard at Burtonwood Drive has a dismissal time of 3:30 PM) and is associated with increases in traffic during student pick-up times.

The yearly crash totals were higher pre-COVID-19 (in 2019) and post-COVID-19 (in 2022) compared to in 2020 and 2021, when there was likely a notable decrease in traffic along the corridor due to the pandemic.

Table 10 provides a summary of the 92 crashes that took place at signalized intersections (i.e., within 150 feet of a signalized intersection) by type. The predominant crash type at signalized intersections were frontal crashes (including angle crashes), followed by rear end crashes.

Table 10. Five-Year Crashes by Type at Signalized Intersections

Signalized Intersection	Crash Type						Total Crashes
	Angle	Other Frontal*	Rear End	Sideswipe	Ran off Road**	Other	
Garrison Boulevard at Chestnut Street	3	5	6	0	0	1	15
Garrison Boulevard at Churchill Drive	1	0	5	1	0	1	8
Garrison Boulevard at Burtonwood Drive	6	7	11	2	1	0	27
Garrison Boulevard/ Armstrong Park Drive at New Hope Road	15	5	19	2	1	0	42

*Other frontal crashes include Left Turn, Same Roadway; Left Turn, Different Roadways; Right Turn, Same Roadway; Right Turn, Different Roadways

**Ran Off Road crashes include Fixed Object; Ran Off Road – Left; Ran Off Road – Right

In addition to crashes at signalized intersections, there were 11 crashes related to unsignalized intersections and 30 crashes related to driveways. These crashes involved a vehicle planning or attempting to turn into or out of an unsignalized minor street or driveway from or onto Garrison Boulevard. **Table 11** summarizes the crash types at these locations.

Table 11. Five-Year Crashes by Type at Unsignalized Intersections and Driveways

Location	Crash Type						Total Crashes
	Angle	Other Frontal*	Rear End	Sideswipe	Ran off Road**	Pedestrian	
Unsignalized Intersections	2	7	0	0	1	1	11
East of Fern Forest Drive and West of Chestnut Street	1	2	0	0	0	0	3
East of Chestnut Street and West of Churchill Drive	1	3	0	0	1	1	6
East of Churchill Drive and West of Burtonwood Drive	0	2	0	0	0	0	2
East of Burtonwood Drive and West of New Hope Road	0	0	0	0	0	0	0
Driveways	6	7	11	6	0	0	30
East of Fern Forest Drive and West of Chestnut Street	0	0	0	0	0	0	0
East of Chestnut Street and West of Churchill Drive	1	0	5	4	0	0	10
East of Churchill Drive and West of Burtonwood Drive	3	2	1	1	0	0	7
East of Burtonwood Drive and West of New Hope Road	2	5	5	1	0	0	13

*Other frontal crashes include Left Turn, Same Roadway; Left Turn, Different Roadways; Right Turn, Same Roadway; Right Turn, Different Roadways

**Ran Off Road crashes include Fixed Object; Ran Off Road – Left; Ran Off Road – Right

Fifty-eight crashes along the study corridor were not at signalized intersections and did not involve vehicles turning into or out of unsignalized intersections or driveways. A majority of these crashes, summarized in **Table 12** by segment, were rear ends or sideswipes, followed by ran off road crashes.

Table 12. Five-Year Crashes by Type: Other Crash Locations

Segment of Garrison Boulevard	Crash Type						Total Crashes
	Angle	Other Frontal*	Rear End	Sideswipe	Ran Off Road**	Other	
All Other Crashes	2	0	33	12	7	4	58
East of Fern Forest Drive and West of Chestnut Street	0	0	0	1	0	0	1
East of Chestnut Street and West of Churchill Drive	0	0	6	8	7	2	23
East of Churchill Drive and West of Burtonwood Drive	1	0	4	0	0	1	6
East of Burtonwood Drive and West of New Hope Road	1	0	23	3	0	1	28

*Other frontal crashes include Left Turn, Same Roadway; Left Turn, Different Roadways; Right Turn, Same Roadway; Right Turn, Different Roadways

**Ran Off Road crashes include Fixed Object; Ran Off Road – Left; Ran Off Road – Right

HISTORICAL VOLUMES

Figure 8 and **Table 13** show the historical volume data collection locations and volumes from the NCDOT Annual Average Daily Traffic (AADT) Mapping Application in proximity to the study corridor. Since 2004, all data collection locations have experienced an overall negative growth in AADT.

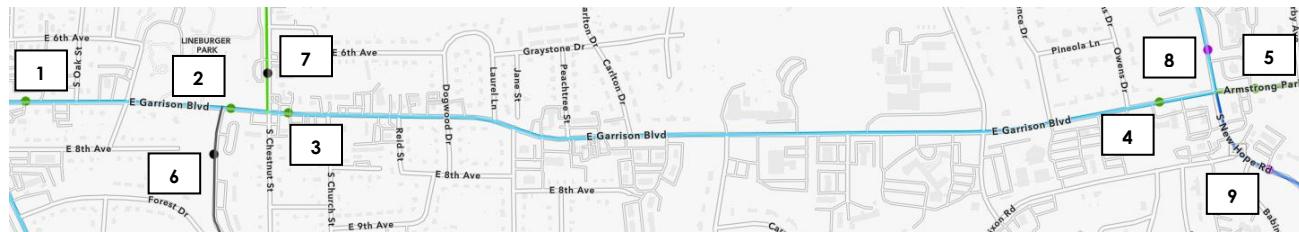

Figure 8. Historical volume data collection locations in proximity of the study intersection.

Table 13. Historical AADT Volumes and Growth

No.	Location	AADT									Compound Annual Historic Growth Rate
		2004	2006	2008	2009	2010	2012	2014	2016	2018	
1	Garrison Blvd east of Union Rd	23,000	24,000	22,000	-	21,000	18,000	19,000	21,000	19,500	-1.46%
2	Garrison Blvd west of Chestnut St	21,000	21,000	20,000	-	20,000	16,000	18,000	18,000	17,500	-1.57%
3	Garrison Blvd east of Chestnut St	21,000	20,000	20,000	-	19,000	18,000	17,000	18,000	17,500	-1.40%
4	Garrison Blvd west of New Hope Rd	14,000	15,000	14,000	-	13,000	12,000	13,000	14,000	13,000	-0.74%
5	Armstrong Park Dr east of New Hope Rd	9,900	10,000	10,000	-	11,000	8,800	9,300	8,700	8,600	-1.33%
6	Fern Forest Dr south of Garrison Blvd	-	-	-	1,900	-	1,800	1,700	1,700	1,800	-1.23%
7	Chestnut St north of Garrison Blvd	-	3,100	2,800	-	2,700	2,600	2,300	2,800	2,500	-1.23%
8	New Hope Rd north of Garrison Blvd	18,000	20,000	20,000	-	22,000	18,000	19,000	19,000	-	-0.21%
9	New Hope Rd south of Garrison Blvd	23,000	26,000	25,000	-	25,000	22,000	24,000	24,000	-	-0.45%

The May 2023 daily volumes collected on Garrison Boulevard east of Chestnut Street and on Garrison Boulevard east of Burtonwood Drive (shown in **Figure 2** and **Figure 3**) were 19,287 vehicles and 14,830 vehicles,

respectively. These volumes are within the historical AADT ranges from 2004 and 2018 for the corresponding historical traffic count locations on Garrison Boulevard.

VOLUME GROWTH POTENTIAL

Table 14 and **Table 15** summarize the daily volume projections and corresponding compound growth rates for the Garrison Boulevard study segments based on the latest version of the Metrolina Regional Model (MRM), MRM22v1.0. Compared to the historical AADT volumes from 2018, the model underestimates the 2018 volume at the west end of the corridor and overestimates the 2018 volume at the east end of the corridor.

Table 14. Garrison Boulevard Volume Projections from Metrolina Regional Model

Segment of Garrison Blvd	2018 Historical AADT	MRM Daily Volumes			
		2018 (Estimated)	2025 (Projected)	2035 (Projected)	2045 (Projected)
Fern Forest Dr to Churchill Dr	17,500	15,920	15,972	16,523	16,809
Churchill Dr to Burtonwood Dr	15,250*	18,983	18,328	19,452	19,628
Burtonwood Dr to New Hope Rd	13,000	19,810	19,525	19,118	19,339

*No historical traffic count in this segment. AADT estimated as average of adjacent segment AADTs (to the west and east).

Table 15. Garrison Boulevard Volume Growth Rates from Metrolina Regional Model

Segment of Garrison Blvd	MRM Compound Annual Growth Rate		
	2018 to 2025	2018 to 2035	2018 to 2045
Fern Forest Dr to Churchill Dr	0.05%	0.22%	0.20%
Churchill Dr to Burtonwood Dr	-0.50%	0.14%	0.12%
Burtonwood Dr to New Hope Rd	-0.21%	-0.21%	-0.09%

For comparison purposes, **Table 16** and **Table 17** show the MRM volume projections and growth rates for New Hope Road just north and just south of Garrison Boulevard/Armstrong Park Drive. The model's projected growth rates are higher for New Hope Road than for Garrison Boulevard, with no negative growth projected.

Table 16. New Hope Road Volume Projections from Metrolina Regional Model

Location on New Hope Rd	MRM Daily Volumes			
	2018 (Estimated)	2025 (Projected)	2035 (Projected)	2045 (Projected)
North of Garrison Blvd/Armstrong Park Dr	21,416	21,638	23,586	24,822
South of Garrison Blvd/Armstrong Park Dr	29,680	30,826	32,593	34,327

Table 17. New Hope Road Volume Growth Rates from Metrolina Regional Model

Location on New Hope Rd	MRM Compound Annual Growth Rate		
	2018 to 2025	2018 to 2035	2018 to 2045
North of Garrison Blvd/Armstrong Park Dr	0.15%	0.57%	0.55%
South of Garrison Blvd/Armstrong Park Dr	0.54%	0.55%	0.54%

The Grier Middle School Expansion TIA applied a CAGR of 0.5% for background growth to forecast future year volumes for near-term scenarios (years 2024 and 2029). In addition, the TIA included new site trips expected to be generated by the school expansion during future weekday AM and afternoon roadway volumes along with re-routing of trips based upon site access modifications. For reference, the expected build TMCs in the opening year of the school expansion (2024) are shown in **Figure 9**, with volumes extrapolated to the Garrison Boulevard and Chestnut Street intersection (as this intersection was not included in the Middle School TIA). Note that some movements have been rounded to reflect a minimum of four vehicles per hour to reflect NCDOT Capacity Analysis Guidelines.

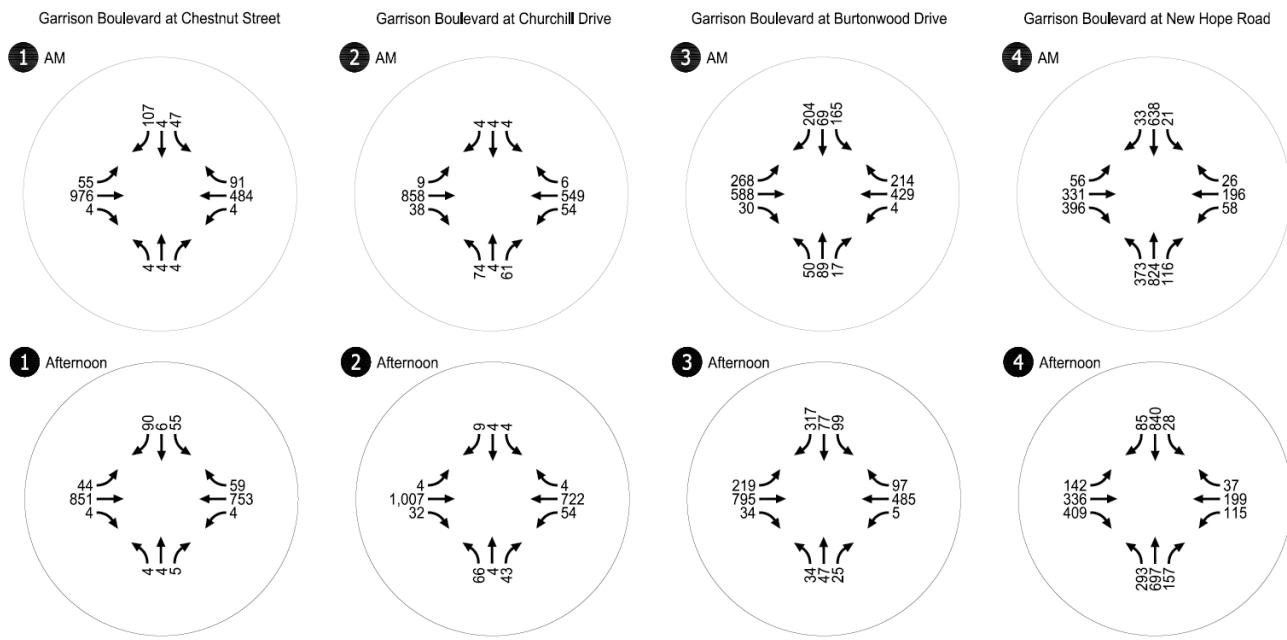

Figure 9. Projected weekday AM and afternoon peak hour TMCs with a 0.5% CAGR for 2024 (Grier Middle School Expansion opening year).

GROWTH RATE AND HORIZON YEAR RECOMMENDATIONS

Through discussions with City of Gastonia and NCDOT staff, an evaluation of historical and MRM data, and a review of the Middle School TIA, we recommend a horizon year of 2045 with an applied CAGR of 0.25% for peak hour background traffic growth plus in-process trips from the Grier Middle School expansion and other known projects. A 0.5% CAGR is recommended for northbound through (NBT) and southbound through (SBT) volumes along New Hope Road at the intersection with Garrison Boulevard.

With a 2045 horizon year and 0.25% background growth rate, the forecasted AADTs are similar to the historical high AADTs observed on Garrison Boulevard at both the western and eastern ends of the study corridor. **Table 18** shows the estimated 2023 and forecasted 2045 AADT volumes (rounded to the nearest hundred) based on the average daily traffic (ADT) volumes collected on Garrison Boulevard in May 2023. (The forecasted 2045 volumes using a 0.5% CAGR are also included for reference.) The historical high AADTs are also shown as a point of comparison.

Table 18. Projected Volumes Using Recommended CAGRs

Count Location on Garrison Blvd	2023 ADT	Estimated 2023 AADT*	CAGR	Forecasted 2045 AADT	Historical High AADT
East of Chestnut St	19,287	19,100	0.25%	20,200	21,000 (2004)
			0.50%	21,300	
East of Burtonwood Dr	14,830	14,700	0.25%	15,500	15,000 (2006)
			0.50%	16,400	

*Applied NCDOT seasonal factor to ADT to estimate AADT: average of May Wednesday and May Thursday seasonal factor for traffic counts under ATR Group 4 is 0.99 (NCDOT, 2013)

The recommended 2045 AADT volumes are close to historical high volumes at both the western and eastern count locations on the corridor. East of Chestnut Street, the projected 2045 AADT would be 800 vehicles lower than the historical high volume using a 0.25% CAGR. East of Burtonwood Drive, the projected 2045 AADT would be 500 vehicles higher than the historical high volume using a 0.25% CAGR.

2045 NO-BUILD INTERSECTION OPERATIONS

To obtain the 2045 weekday AM and afternoon peak hour volumes, the volume forecast methodology from the Middle School TIA was used for consistency. Existing school trips related to Grier Middle School (provided in **Appendix E**) were first removed from the 2022 or 2023 existing volumes, with the trip removal extrapolated to the Chestnut St intersection. Then, the 0.25% CAGR for background growth (or 0.5% CAGR for NBT and SBT New Hope Road) was applied to the adjusted existing volumes to obtain 2045 volumes without school-related trips. Finally, the site trips from with the school expansion and committed background trips from the Middle School TIA (extrapolated to the Chestnut St intersection) were added to obtain the total 2045 weekday AM and afternoon volumes.

To obtain the 2045 weekday PM peak hour volumes, a 0.25% CAGR (or 0.5% CAGR for NBT and SBT New Hope Road) was applied to 2023 existing volumes. **Figure 10** shows the projected 2045 weekday AM, afternoon, and PM peak hour volumes.

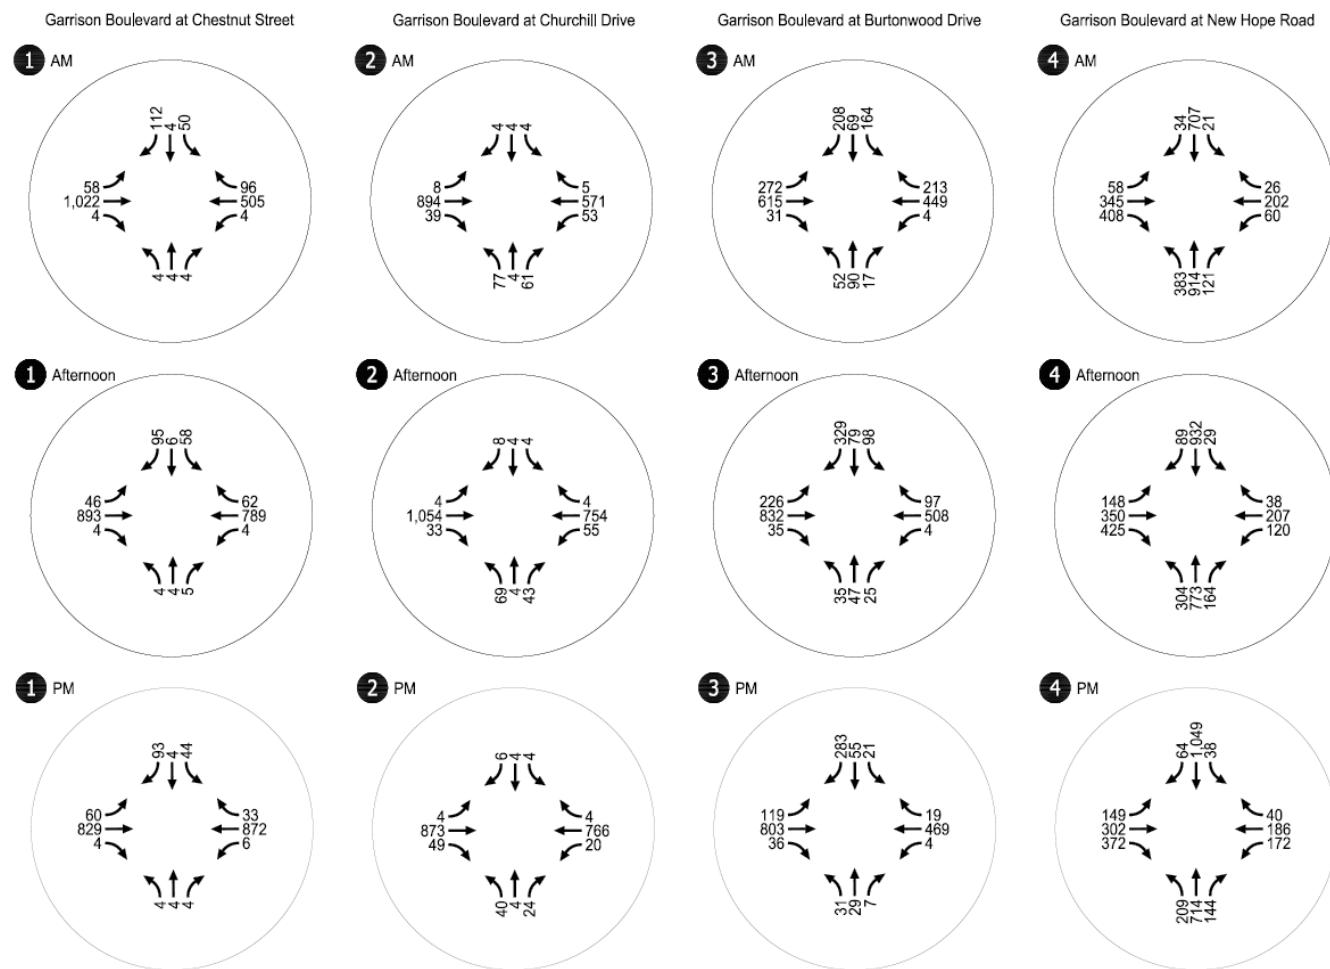

Figure 10. Projected 2045 weekday AM, afternoon, and PM peak hour TMCs.

Based on a comparison of the projected 2045 weekday afternoon and PM peak hour volumes, the critical time period of the two is afternoon peak hour. Because of this, the 2045 no-build future year traffic analysis was conducted for the 2045 weekday AM and afternoon peak hours, with the same peak hours anticipated to be evaluated for the 2045 build scenarios.

According to the recommendations in the Middle School TIA and through confirmation with the City of Gastonia, an additional southbound left turn lane is to be constructed on Burtonwood Drive at Garrison Boulevard in conjunction with the school expansion project. As a result, this additional lane was included the 2045 no-build analysis, summarized in **Table 19** through **Table 22**. However, the lane configurations for the Burtonwood Drive intersection will be revisited as part of the future year build alternatives evaluation.

To evaluate the 2045 no-build operations, the existing cycle length at all study intersections (110 seconds) was kept, as all four signals are coordinated, but the splits were optimized.

Table 19 through **Table 22** summarize the 2045 no-build approach-level intersection operations for the weekday AM and afternoon peak hours. Under no-build conditions, the three western intersections are projected to operate at a LOS D or better during each peak hour analyzed. The New Hope Road intersection is projected to operate at an overall LOS D in the AM peak hour and an overall LOS E in the afternoon peak hour. Full 2045 no-build operational analysis results are provided in **Appendix F**.

Table 19. 2045 No-Build Intersection Peak Hour Operations: Garrison Boulevard at Chestnut Street

Approach	Level of Service (LOS)		Delay (s/veh)		Synchro 95 th Percentile Queue Lengths (ft)

APPENDIX B – NCDOT SIGNAL TIMING PLANS

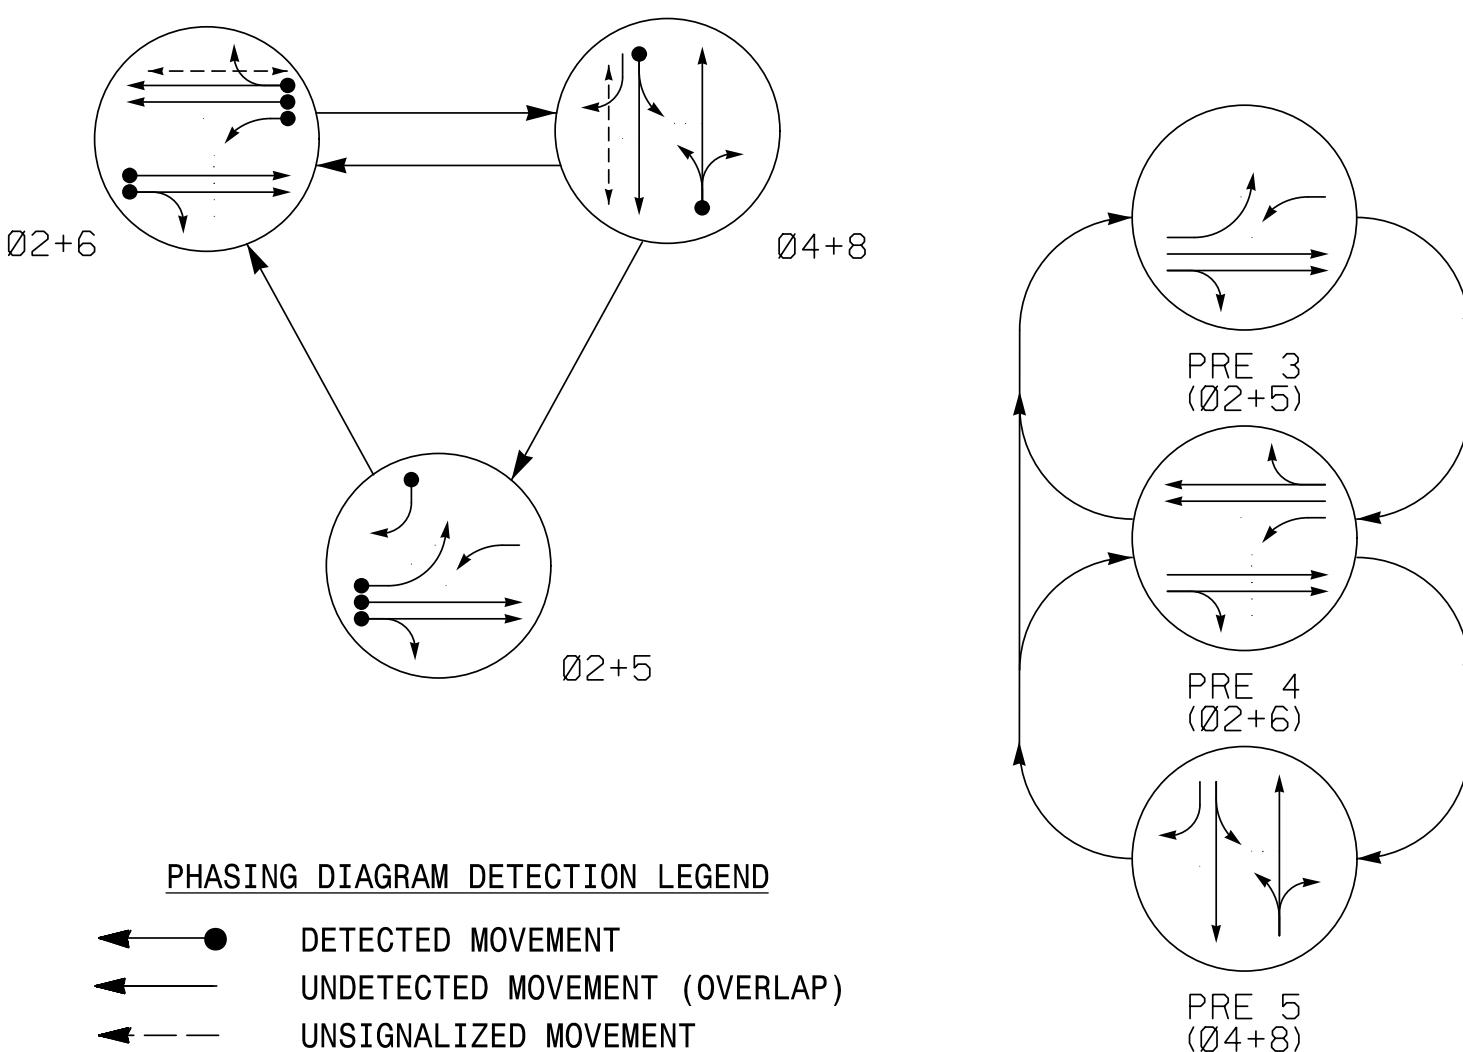

**3 Phase
Fully Actuated
w/ Emergency Vehicle Preemption
Gaston Signal System**

NOTES

- Refer to "Roadway Standard Drawings NCDOT" dated January 2018 and "Standard Specifications for Roads and Structures" dated January 2018.
- Do not program signal for late night flashing operation unless otherwise directed by the Engineer.
- Phase 5 may be lagged.
- Reposition existing signal heads numbered 62 and 63.
- Set all detector units to presence mode.
- In the event of loop replacement, refer to the current ITS and Signal Design Manual and submit a Plan of Record to the Signal Design Section.
- Locate new cabinet so as not to obstruct sight distance of vehicles turning right on red.
- Omit "WALK" and flashing "DON'T WALK" with no pedestrian calls.
- Program pedestrian heads to countdown the flashing "Don't Walk" time only.
- Remove existing "Left Turn Only" sign-(R3-5L).
- Pavement markings are existing.
- Maximum times shown in timing chart are for free-run operation only. Coordinated signal system timing values shall supersede these values.
- Disconnect and abandon existing loops 6C and 6D.
- Install new cabinet on the existing cabinet foundation.
- All new cabinets and base extenders shall be black in color. See Project Special Provisions for details.
- Reconnect lead-in cable to separate loops 2A, 2B, 2C, 2D, 6A & 6B, as shown.
- Existing signal heads 61 and 62 have been relabeled to 62 and 63, respectively.
- Existing loops 4B and 6E have been relabeled to 5B and 6C, respectively.
- Install GPS emergency preemption system per manufacturer's instructions to achieve preemption needed, as shown in phasing diagram.
- All proposed pedestrian signal heads shall be black in color. See Project Special Provisions for details.
- All proposed pedestrian pedestals and pushbutton posts shall be black in color. See Project Special Provisions for details.
- City system data:
Controller Asset #0096.

NOTES

- Refer to "Roadway Standard Drawings NCDOT" dated January 2018 and "Standard Specifications for Roads and Structures" dated January 2018.
- Do not program signal for late night flashing operation unless otherwise directed by the Engineer.
- Reposition existing signal heads numbered 22, 23, 62, and 63.
- Set all detector units to presence mode.
- In the event of loop replacement, refer to the current ITS and Signal Design Manual and submit a Plan of Record to the Signal Design Section.
- Locate new cabinet so as not to obstruct sight distance of vehicles turning right on red.
- Omit "WALK" and flashing "DON'T WALK" with no pedestrian calls.
- Program pedestrian heads to countdown the flashing "Don't Walk" time only.
- Remove existing Left Arrow "ONLY" Signs-(R3-5L).
- Pavement markings are existing.
- Maximum times shown in timing chart are for free-run operation only. Coordinated signal system timing values shall supersede these values.
- Disconnect and abandon existing loops 2B and 6B.
- Install new cabinet on the existing cabinet foundation.
- All new cabinets and base extenders shall be black in color. See Project Special Provisions for details.
- Existing signal heads 21, 22, 61, and 62 have been relabeled to 22, 23, 62, and 63, respectively.
- All proposed pedestrian signal heads shall be black in color. See Project Special Provisions for details.
- City system data:
Controller Asset #0276.
