

SECTION 8.00 CLEARING AND GRUBBING

8.01 Description

The work of clearing shall consist of the cutting, removal and satisfactory disposal of all vegetation and debris.

The work of grubbing shall consist of the removal and satisfactory disposal of all vegetation and all surface debris.

The work of clearing and grubbing shall also include the removal and satisfactory disposal of crops, weeds, and other annual growth; the removal and satisfactory disposal of fences, steps, walls, building foundations, and other rubble and debris; and the filling of holes and depressions.

Clearing and grubbing operations shall be completed sufficiently in advance of grading operations as may be necessary to prevent any interference with the grading or paving operations.

8.02 Soil Erosion

All work shall be done in such a manner so as to minimize soil erosion and shall be done in accordance to Local, State and Federal regulations governing siltation and erosion. Any conflict between those regulations and the standards contained herein shall be brought to the attention of the City Engineer prior to construction. See, including but not limited to, Section 6.26 and 6.27.

8.03 NCDOT Specifications

Work performed under this section shall conform to Section 200 of the NCDOT "Standard Specifications for Roads and Structures", latest revision. Any conflict between these standards and the NCDOT Standards shall be brought to the attention of the City Engineer prior to construction. (See Section 6.11).
